Introduction

The following Release Notes document the new features and bug fixes in Onyx 7.9 version.

Licensing Information

The number of users in Security Administration must not exceed the number of users allowed by your Onyx license agreement. When the number of concurrent users exceeds the number of Onyx licenses, no additional users can log on until a logged-on user logs off. If you need additional licenses, contact your Avolin Account Manager

New Platform Support

We had conducted thorough testing for Windows Server 2019 and MS SQL Server 2019 RC1 to confirm Onyx compatibility. Following components were covered by the testing:

- OEDB
- OEAS
- OEP
- OES
- OFA
- OGS
- Insight
- Onyx Web Services
- Onyx Mobile Web
- Scripting

New features

Onyx 7.9 contains enhancements that enable you to work more efficiently in Onyx. The enhancements made in this release are:

Added date/time settings support into TextBox-DateTime for Scripting Mobile

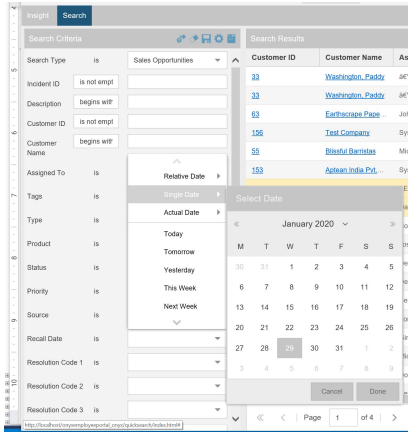
Added date/time settings support into Calendar control for Scripting Mobile

DateTime controls format standardization

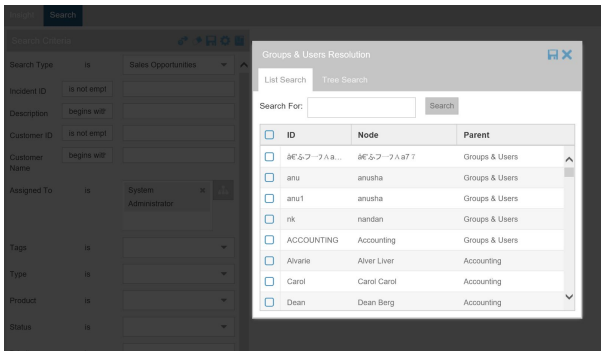
Updates to Onyx Mobile to support latest iOS and Android platforms

Navigator Improvements

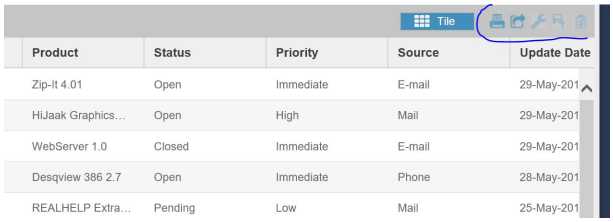
1) Date Panel: Single Date and Relative Date filter conditions added to the filter control.



2) New filter control type added: Modal Tree Panel



3) A new filter control type added: Toggle Panel. The control represents boolean type filter conditions and can be set using a 'boolean' control_type in a record of navigator_entity_field_master table.
4) Customization support on Result Grid Tool Actions: all items of this toolbox are now customizable.



The action toolbox items are controlled with ResultGridToolActionGroup and ResultGridToolActionItem and as well the ability to custom behavior in the ResultGridToolAction.js file.
